Edition Overview

What is Rillsoft Project?

Specialized Solution for Multi-Project Resource Planning

- Windows desktop client for professional project planning
- Focus on realistic scheduling under limited resources
- For mid-sized companies with 20–200 employees
- Developed by Rillsoft GmbH since 2003
- Not a task manager – real planning logic with resources & skills

The Key Question:

„Welche Projekte sind mit den vorhandenen Mitarbeitern, Qualifikationen und Maschinenkapazitäten realistisch umsetzbar?“

www.rillsoft.com

Core Features of Rillsoft Project

Multiprojekt- Ressourcenplanung

Plan resources across multiple projects simultaneously and detect bottlenecks early

Kapazitäts- planung

Skill-based capacity check – before assigning specific individuals

Termin- planung

Gantt, network diagram, critical path, forward & backward scheduling

Personaleinsatz- planung

Employee utilization, shift planning, demand-driven assignment

Project Controlling

Baselines, target vs. actual comparison for dates, effort, and costs

Resource Pool

Central management of capacities, skills, and working hours

Three Deployment Modes – Flexibly Combined

Standalone

File-based

- Local project files
- No server infrastructure required
- Ideal for solo planners & small teams
- Import/Export: MS Project, Excel
- Ready to use immediately

⚠ Aggregate projects not available

Server Mode

Rillsoft Integration Server (On-Premise)

- Installed in your corporate network
- Central project database
- Multi-user operation
- Full data control
- Time tracking, DMS, leave planning

⚠ Linux server (Debian / Alma Linux)

Cloud Mode

Rillsoft Cloud

- Server hosted by Rillsoft
- No infrastructure project needed
- Internet access is sufficient
- Starter from 720 €/year
- Standard from 1,440 €/year

⚠ Rillsoft Project remains the desktop client

Rillsoft Integration Server – Feature Overview

Multi-User Operation

Multiple planners work simultaneously on projects & portfolios

Time Tracking

Employees report actual effort directly via the web interface

Leave Planning

Request, approve & automatically apply absences to resource planning

Document Management

Store project documents centrally & make them accessible to teams

Email Notifications

Automatic alerts on task and project changes

REST API

Integration with ERP, DMS, or external time-tracking systems

Technical Details

Deployment

On-Premise (Linux)

Datenbank

MariaDB, MySQL
Oracle, PostgreSQL

OS

Debian 12
Alma Linux 9.x

Architecture

SOAP + REST API

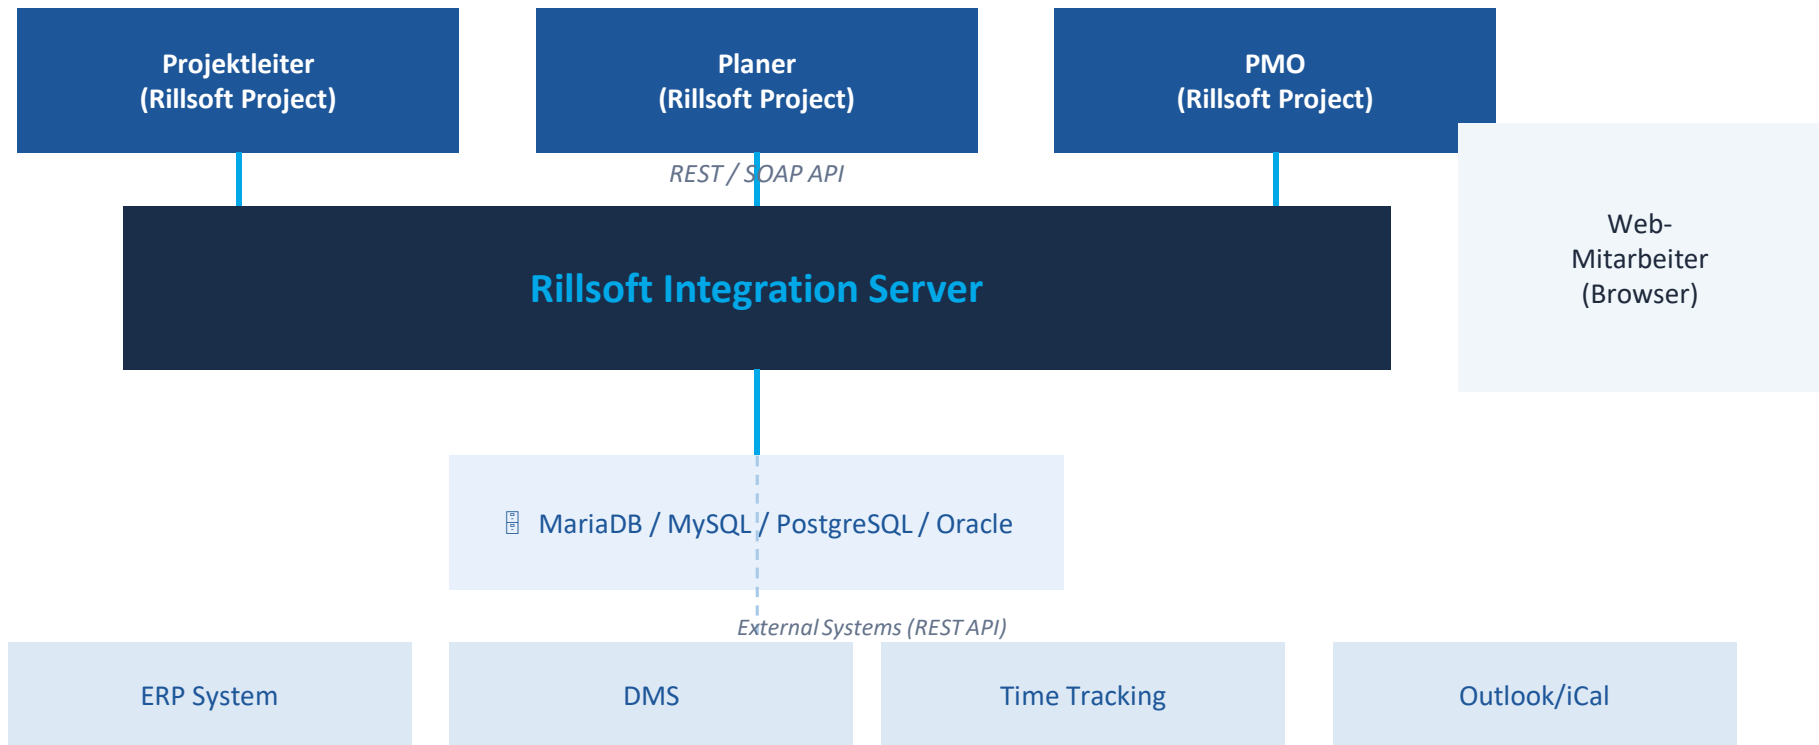

Tenants

Multi-tenant

Kalender

iCal / Outlook
Google Kalender

System Architecture – Rillsoft Platform

Target Groups & Industries

Target Groups

Project Manager

Project planning, schedule monitoring, resource assignment

Project Planner

Resource & capacity optimization in planning

PMO

Managing parallel projects & portfolio management

Department Head

Employee utilization & capacity review

Employee

Time tracking & task overview (web interface)

Typical Industries

 Mechanical & Plant Engineering

 Production & Manufacturing

 Engineering Offices

 IT Service Providers

 Technical Service Providers

 PMO Organizations (SME)

Geographic Focus: DACH Region (Germany, Austria, Switzerland)

Licensing & Pricing

Standalone

Einmalige
Lizenzkosten

- Light / Standard / Professional / Enterprise
- Local file storage
- 30-day free trial
- Updates included within major version
- Maintenance contract: 15% p.a. optional

Single-seat & floating licenses

Integration Server On-Premise

Auf Anfrage
(Floating ab 5)

- Professional & Enterprise Edition
- Central database operation
- Full feature set
- Time tracking, DMS, leave planning
- Linux installation (Debian/Alma)

Floating licenses (Citrix / Terminal Server)

Rillsoft Cloud

From 720 €/year

- Starter: 720 €/year, 1 floating, 10 staff
- Standard: 1,440 €/year, 2 floating, 30 staff
- No own server required
- Full Integration Server feature set
- 30-day free trial

Subscription model

Try It Free Today!

30-day trial – no commitment, no credit card required
